

# OISHIEKA MOITRA

## AI-NATIVE FULL STACK DEVELOPER

Tampa 33647 | United States | 7274125034 | OMOITRA@GMAIL.COM  
omi-moitra.github.io

---

### PROFESSIONAL SUMMARY

- Curious, energetic Full Stack Developer who enjoys turning complex requirements into reliable web and mobile experiences.
- Builds across React, Node.js, Express, MongoDB, Java, Spring, and MySQL, with hands-on work in REST APIs, authentication, data modeling, validation, testing, and analytics.
- Approaches engineering as a disciplined problem-solving process: break down the system, trace edge cases, test assumptions, document decisions, and iterate until the behavior is dependable.
- Uses AI-assisted development thoughtfully to investigate problems, compare implementations, review code, reproduce defects, and validate changes before accepting them.

### TECHNICAL SKILLS

Python; SQL; Javascript; Java; Springboot; Microsoft Suite; MySQL; Postman; DBeaver; MongoDB; React; Node.js; Express; HTML; CSS; JPA/Hibernate; Expo

### PROJECTS

#### Rocket Elevators Website + Admin Dashboard | React, Node.js, Express, MongoDB Atlas, Mongoose, Chart.js

- Engineered a public company site and session-protected admin portal with agent CRUD, validated transaction entry, Express REST APIs, and MongoDB Atlas persistence.
- Turned transaction data into useful operational views with Chart.js reports for agent totals, 14-day trends, regional performance, and business share.

#### Rocket Food Delivery Backoffice | Java 21, Spring Boot, Spring MVC, Spring Data JPA, MySQL, JWT, Thymeleaf, MockMvc

- Implemented a layered Spring Boot API across controllers, services, repositories, and MySQL for a broad food-delivery domain.
- Strengthened API boundaries with JWT protection, DTO models, Jakarta validation, shared success envelopes, structured JSON errors, and native SQL queries.
- Used JUnit 5 and MockMvc to verify responses, status codes, validation paths, and error handling, then documented the API for Postman-based testing.

#### Rocket Food Delivery App | React Native, Expo Router, Java, Spring Boot, MySQL, JWT, AsyncStorage, Jest

- Built role-aware customer and courier experiences with Expo Router, React Context, AsyncStorage, persisted JWT sessions, and protected nested navigation.
- Integrated Spring Boot/MySQL APIs for restaurant filtering, menu totals, order creation and history, courier acceptance and status progression, and account updates.
- Designed loading, empty, error, retry, and session-expiry states; verified client services with Jest, Postman, simulator/device QA, and an ngrok phone-testing workflow.

#### CodeBloggs | React, Redux/Thunk, Node.js, Express, MongoDB/Mongoose, Session Auth, Multer

- Co-developed a responsive React SPA where developers can register, authenticate, manage posts, comment and reply, like content, upload profile images, and see online users.
- Worked across Redux/Thunk state, reusable UI components, Express REST resources, Mongoose models, cookie-session guards, bcrypt authentication, validation, and Multer uploads.
- Implemented nested-reply, profile/theme, and heartbeat-presence behavior; helped establish the team's Git branch and pull-request workflow.

### CORE COMPETENCIES

Full-Stack System Design; REST API Design & Integration; Authentication & Authorization; Data Modeling & Validation; Testing, Debugging & Edge-Case Analysis; AI-Assisted Engineering

### PROFESSIONAL EXPERIENCE

#### Law Clerk, Bay Area Legal Services

Tampa, FL | 2025 - 2026

- Deconstructed complex matters into requirements, dependencies, risks, and clear next actions using the same structured reasoning applied to software systems.
- Caught inconsistencies, missing terms, and edge cases, then documented findings and recommended corrective action.
- Researched statutes, regulations, and policies to resolve ambiguity and translate rules into practical guidance.
- Coordinated with internal teams and external parties to clarify requirements and move work to completion.
- Maintained traceable records and concise decision-support summaries in a detail-critical environment.

#### Summer Associate, Wells, Anderson & Race, LLC

Denver, CO | 2021

- Cross-checked multiple sources to surface inconsistencies and verify conclusions.
- Converted complex findings into precise, decision-ready written analysis.

#### Life Insurance Agent, Liberty National Life Insurance Company

Tampa, FL | 2019 - 2020

- Translated detailed policy terms and contractual obligations into clear guidance for clients.
- Applied regulatory rules consistently and maintained accurate, auditable transaction records.

#### Independent Contractor Tutor, Varsity Tutors

Tampa, FL | 2018 - 2020

- Designed structured learning plans, tracked progress, and adjusted the approach as new information emerged.
- Diagnosed knowledge gaps and translated complex concepts for learners with different needs.

### EDUCATION

#### Professional Certificate in Full Stack Development, Codeboxx

St. Petersburg, FL | 2026

#### Juris Doctor (J.D.), University of Colorado Law School

Boulder, CO | 2024

#### Bachelor of Science (B.S.), Biomedical Sciences, University of South Florida

Tampa, FL | 2019

### LANGUAGES

English; Hindi; Bangla; French
